

Finishing element, the Aluminium skirtings protect the bottom of the wall in rooms where activity isn't excessive.

Lacquered aluminium skirtings

Skirtings are used for a clean floor joint and to protect the bottom of walls in rooms where the activity is not too intensive. Fixings are hidden behind a system of removable screw cover. Two mastic cords are made onto the lower and upper throats of the skirting. Ends, internal and external connection piece enable a perfect finishing.

Colour of lacquered Aluminium :
White RAL 9010
