

Stainless steel coving section

GSP-1005-E/B

The Stainless steel coving sections are designed for the sanitary cladding of partition-to-partition and partition-to-ceiling angles. Their rounded shape facilitates the cleaning according to the hygiene rules. They allow perfecting the finish in the connecting angles of the work spaces.

Airtight and full stainless steel coving sections

Made up of a stainless steel profile clipped onto a rigid PVC bracket fixed with screw.

Mastic finish on all edges.

Stainless steel internal and external connection pieces and nozzles totally flush.
