

Stainless steel angle protections

GSP-1009-E/C

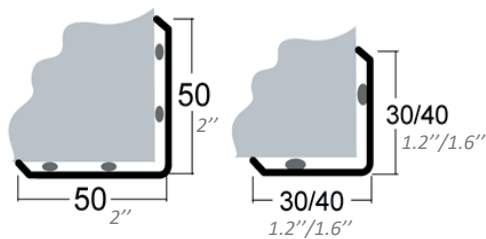

The covering of the salient angles in premises where the traffic is very intense can be realized with angle protections.

Tested to resist to shocks and to corrosion, these protections improve the aesthetics and protect the longevity of partitions.

Characteristics

Bio Areta : stainless steel angle protection

The protection is bonded directly on the partition

Profil'Inox 30 & 50 : adhesive angle iron 90 ° in brushed stainless steel
